

Apprentice Case Study

Anthony Russell - Level 2 Performing Manufacturing Operations - Apprenticeship

Anthony Russell, whose previous role was to produce fire rated door sets as a CNC operator, is now undertaking his Performing Manufacturing Operations Apprenticeship with Group Horizon. Anthony is working as a Technical Operator for Robinson Brothers which involves being responsible for the day to day running of a plant using hydrogenation processes.

"This diploma has been a great opportunity for me to gain a greater understanding of the key information which will help me to further my knowledge in my current and future roles. I have learnt various new skills including understanding the value of good communication in the workplace and enjoyed revising my knowledge of COSHH which is crucial within my current role."

The Apprenticeship has given Anthony the confidence to go further saying *"I feel I have given myself a chance to better my knowledge, and in doing so it has given me more confidence to try and take on the responsibility of a higher role within the company."*

Anthony has been impressed by the standard of delivery *"I would definitely recommend people who would like to further their knowledge of manufacturing operations to take this course."* Anthony added *"I am very grateful to Robinson Brothers for this opportunity to gain this qualification and further my knowledge. The training I have received from Group Horizon has been great and I have taken lots of useful information along the way."*
