

Apprentice Case Study

Liam Doughty - Level 3 Junior Energy Management - Apprenticeship

Liam Doughty from Gateshead, previously worked in Facilities Management before starting a new role as an Energy Technician within Gateshead Council. Liam did not have any previous background within the Energy Industry, so he was looking to complete an energy related qualification.

After finding the Junior Energy Management Apprenticeship opportunity with Group Horizon, Liam feels that the *“qualification has provided me with a massive opportunity allowing me to not only progress with my knowledge and skills in the energy industry but help me move forward in my career.”*

Liam is currently enjoying the course so far saying *“All the staff at Group Horizon have been fantastic and have clearly put a lot of work into making the programme happen, from the preparation of the classroom days to the reviews and assessment of the assignments. All staff are more than happy to answer your questions, both on the classroom days or during our ‘on the job’ days. I’m very happy with the overall course and the people delivering.”*

Liam is hoping that this is just the start of his career in the industry saying *“The training has provided me with a foundation to start within the Energy Industry, allowing me to then further my education in this field. My goal is to complete the Junior Energy Manager Apprenticeship with sight to go onto a higher-level education within this field.”*
