

Apprentice Case Study

Karen Bradley - Dual Fuel Smart Meter Installer, Morrison Utility Services

Karen is currently undertaking a Level 2 Apprenticeship in Dual Fuel Smart Meter Installation with Group Horizon.

Karen has been living in Exeter for the last 12 years and was working as a civil servant at the local job centre before being made redundant in early 2016.

Looking for a complete change to the office job she was use to, a job centre colleague recommended the Dual Fuel Smart Meter Apprenticeship - *“When I was made redundant I knew I wanted to do something totally different and the opportunity with MUS and Group Horizon came along at exactly the right time.”*

Karen began her training last July and hasn't looked back. She has already spent time out in the field learning from her mentors and gaining hands on experience fitting meters - *“I have learnt so much already. I've really enjoyed my time so far out and about.”*

Based in the Exeter region with MUS, Karen is looking forward to completing her apprenticeship later this year and continuing to work installing meters into customers homes.

“I am really pleased to have had this opportunity and am excited for the future - I certainly will not be going back to working in an office again.”
