

Data Technician Apprenticeship Level 3

Source, format and present data securely in a relevant way for analysis

About this programme

The Data Management job market has been steadily rising for the past 5 years and is now at a peak across the UK. This apprenticeship is designed to fill a gap in the market for Junior and introductory Data roles in the UK where data is generated or processed including but not limited to finance, retail, education, health, media, manufacturing and hospitality.

This apprenticeship specifically focuses on training and developing Data technicians who can support the business day to day data needs. It is a qualification that teaches apprentices how to utilise a wide variety of tools and techniques to manage and analyse data, both internally and externally.

Our delivery reflects a number of different areas around data management, including types of data, data tool, data architecture, data quality, data analysis techniques and how to communicate data and results effectively.

Who is this programme for?

This programme is designed for new and existing employees who wish to progress and develop their skills in a growing industry. These are transferable skills and have application in most facets of modern industry or apprentices may also to choose to progress onto the Level 4 Data Analyst Apprenticeship.

Duration

This programme can take up to 24 months to complete.

Qualifications included

On successful completion of this programme individuals will receive the following;

- Data Technician Apprenticeship at Level 3
- Level 2 Functional Skills, English *(If required)*
- Level 2 Functional Skills, Maths *(If required)*

Course Content

This Apprenticeship offers a balance of technical training and on the job activities to match needs and requirements of the apprentice's employer. The knowledge and assessment units include;

- Sourcing Data
- Extracting and Formatting Data
- Data Blending and Joining
- Stakeholder Collaboration
- Presenting Data
- Introduction to Statistics
- Data Quality
- Policies and Legislation
- Emerging Technology

Delivery

Throughout the Apprenticeship learners will be required to attend a series of online sessions covering the technical theory and industry best practice. Learners will also be required to complete functional skills elements of the course if required. Work based activities are included to maximise the impact of the learning and relevance to the workplace.

All sessions are planned in advance to enable accommodation of learner and employer requirements.

End Point Assessment (EPA)

After completing the learning delivery phase of the programme there is a gateway review to ensure the learner is ready for End Point Assessment.

The End Point Assessment is the opportunity to demonstrate the knowledge skills and behaviour gained throughout the programme. The assessment comprises a scenario demonstration and professional discussion based on a portfolio of evidence generated throughout the programme.
